

STATE OF HAWAII  
PUBLIC UTILITIES COMMISSION

PETROLEUM INDUSTRY  
MONITORING, ANALYSIS AND REPORTING PROGRAM  
WEEKLY REPORT  
For Reporting Period  
October 1 – 7, 2007

BACKGROUND

On a weekly basis, the Public Utilities Commission (“Commission”) collects confidential petroleum industry data and information from distributors and major fuel users as part of the Petroleum Industry Monitoring, Analysis and Reporting (“PIMAR”) Program. The weekly PIMAR reports that the Commission receives from reporting entities include company-specific, detailed data and information regarding petroleum product imports, exports, inventories, production, retail and wholesale transactions, and gross margins. All of the data and information submitted to the Commission is filed under confidential seal by the reporting entities under confidential protective order and Hawaii Revised Statutes (“HRS”) Chapter 486J. Accordingly, the data and information cannot be publicly disclosed unless they are aggregated to the extent necessary to maintain confidentiality. In instances where data is provided by only a few reporting entities and aggregation does not ensure confidentiality, the Commission cannot release the data.<sup>1</sup>

Each PIMAR Weekly Report published by the Commission includes a compilation and aggregation of data and information that reporting entities file with the Commission in their weekly submissions. Where submitted data appears questionable or inconsistent with other information sources,<sup>2</sup> or otherwise suggests that further examination is warranted, the Commission conducts additional reviews to clarify them and resolve any discrepancies.

---

<sup>1</sup>For instance, because there are only two refiners in Hawaii, there are not enough companies to aggregate the confidential information from the two refiners to maintain the confidentiality of the information. This includes information concerning imports and production by the refiners.

<sup>2</sup>For example, the Commission collects retail price information from Oil Price Information Service (“OPIS”) for both Hawaii and the nation that are reflected in price comparison graphs on the Commission’s website at: <http://www.hawaii.gov/budget/puc/>. The retail price information for Hawaii is obtained by OPIS from a sample of gasoline service stations located throughout Hawaii.

## INVENTORIES FOR THE REPORTING PERIOD

The Ending Inventory Table below is based on Form W-120 reports, through which reporting entities with control of storage tanks report all inventory held at bulk terminals. This data is also presented by week, starting with the first reports filed for week ending July 1, 2007, in the Appendix to this report.

### SALES TRANSACTIONS FOR THE REPORTING PERIOD

The Sales Volume and Price Tables below are based on Form W-130 reports, through which reporting entities report product sales volumes and weighted average prices for retail and wholesale transactions and for products that are transferred, exchanged or company-used. Weighted average prices shown exclude all taxes on the sale of the product, such as federal, state and local excise and sales taxes.

\* Confidential Information

<sup>3</sup>The retail sales information summarized in this table is based only on information reported by distributors, as defined under HRS § 486J-1, as amended, that have conducted retail transactions during the reporting period. The PUC does not collect information from lessee dealer-operated stations, owner-operated stations or other retailers that retail fuel only to end users or the public.

All of the retail and wholesale sales volumes and prices reported since the first reports filed for week ending July 1, 2007, are presented by zone and week in the Appendix to this report.

## DEFINITIONS

- Diesel: Aggregates all diesel fuels and their various sulfur contents (including off-road and marine diesel fuels)
